EDUCATION

Rice University

B.S. in Computer Science, Minor in Data Science | GPA: 3.96/4.0

Houston, TX

Expected May 2028

WORK EXPERIENCE

AT&T

Summer 2026

Software Engineering Intern

Dallas, TX

- Modernized legacy cell tower logistics platform using **React**, **TypeScript**, and **TailwindCSS**, unifying UI tooling
- Redesigned tower visualization from client-side to server-side rendering, reducing diagram generation time by **47%**
- Expanded test coverage from **5%** to **92%** and resolved **100+ SonarQube** quality and security issues
- Built an agentic customer messaging workflow with **LangGraph** and **Next.js**, earning **1st** at intern hackathon

AbbVie

Summer 2025

Software Engineering Intern

North Chicago, IL

- Architected an agentic compliance review tool for medical affairs content using **Python**, **LangGraph**, and **AWS**
- Integrated **OCR** and **RAG** to process multimodal documents and ground compliance analysis in reference materials
- Partnered with compliance officers to gather requirements, prototype workflows, and iterate through **user testing**
- Improved review accuracy by **23%** and reduced cycle time by **37%**, generating **\$100K+** in annualized savings

AbbVie

Summer 2024

Data Science Intern

North Chicago, IL

- Engineered a **Python** and **SQL** data pipeline automating ingestion and processing of infusion pump flow-rate data
- Implemented plugin-based analysis tooling for automated aggregation and cross-run comparisons in **Power BI**
- Identified and corrected a continuous-infusion calculation error, improving dosage accuracy by **10%**

PROJECTS

Pressurized Rover Controller, Project Manager

September 2025 – May 2026

- Architected interface integrating autonomous navigation and mission planning for NASA's Artemis lunar operations
- Coordinated **20+** engineers and designers through **Agile/Scrum**, managing sprints and code reviews with **GitHub**
- Developed navigation-vision pipeline, integrating **PyTorch** and LiDAR to achieve **94%** detection accuracy

Augmented Reality Spacesuit, Technical Lead

September 2024 – May 2025

- Led **10+** developers building a **HoloLens 2** interface for astronaut navigation, telemetry, and EVA procedure support
- Built **C# REST APIs** for real-time spacesuit telemetry streaming and cross EV communication
- Reduced cognitive load by **26%** and procedure completion time by **35%** through iterative human-in-the-loop testing

LEADERSHIP

Rice Augmented and Virtual Reality Club, President

September 2025 - Present

- Directing a **50+** member organization spanning technical workshops, industry events, and research initiatives
- Managing a **two-time** nationally selected NASA SUITS team building software for lunar operations
- Overseeing Reality Roost, a multiplayer VR platform exploring immersive and interactive data visualizations

SKILLS

- *Languages:* Python, Java, TypeScript, JavaScript, C#, C, SQL, HTML/CSS
- *Technologies:* React, Node.js, Express, Next.js, FastAPI, PostgreSQL, MongoDB
- *Machine Learning:* PyTorch, TensorFlow, Scikit-Learn, OpenCV, YOLO, LangGraph, Ollama
- *Tools:* Linux, Git, GitHub, AWS, Docker, Figma, Claude Code, GitHub Copilot
